INSTALLATION STEPS:

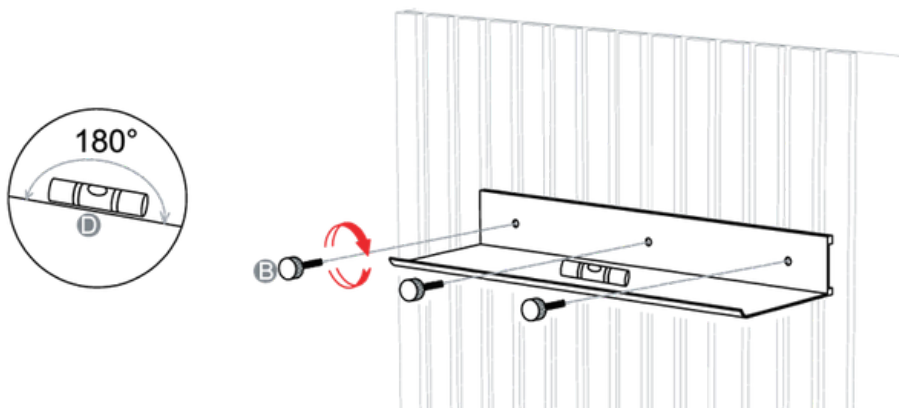

Step 1: Confirm the installation location. Place the nut into the gap of the wooden strip in parallel. Press the nut a bit and then rotate it clockwise to lock the nut, as shown in the right picture.

Step 2: Place the spirit level on the shelf and fine-tune the nut position to align with the shelf's hole positions.

Step 3: Gently adjust the shelf up or down to ensure it is level, using the spirit level as a guide. Once it is properly aligned, tighten all the screws. The installation is now complete.
